

## POWER SUPPLY AF2

The AF2 power supply generates a high voltage, which is needed to run ionizers.

The AF2 power can feed up to 4 antistatic devices, has external Jack connectors, is mounted in a painted metal box, with ON / OFF control switch, signal lamp in service and thermal circuit breaker for protection in case of faults of the secondary one.

Available also with remote contact versioni

AF2	
Weight	4,1 Kg
Ambient temperature	0-60°C
Primary tension	230 V, 50/60 Hz
Secondary tension	6500 V
Consumption	60 W
Short circuit current	3 mA
